

Sysco Solutions Partners

Company Description:

Headquartered in Atlanta, GA, NCR Corporation offers technology and services built for full-service, fast casual, quick-service and everything in between, including our core restaurant management platform, NCR Aloha. Our solutions are built to scale as restaurants grow.

Value:

With both global scale and a local focus, our restaurant industry experts help brands solve the difficult challenges they face as they accelerate their digital transformations.

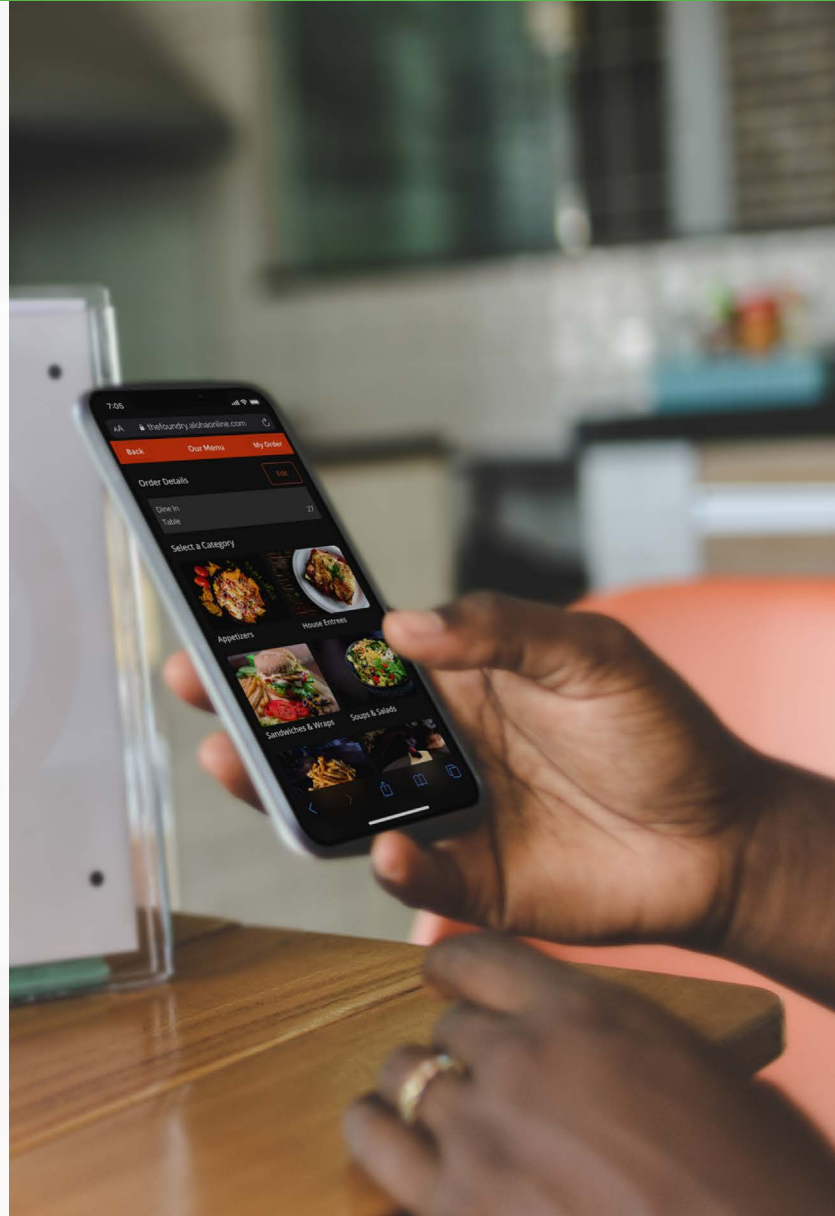

Advantage:

We have over 20,000 service professionals in 160 countries around the world, focused every day on taking care of our customers and supporting their technology.

We are one of the only companies that can run the restaurant from wall-to-wall. We provide greater simplicity by giving our customers a single number to call when needing any type of support.

Product Offering:

NCR Aloha is an all-in-one, cloud-enabled restaurant management and point-of-sale (POS) platform that helps restaurants focus on their food, not their technology. It serves as the heart of a restaurant's operations and helps restaurants adapt to industry transformation, drive revenue, increase speed and efficiency, grow new business and increase guest engagement.
